

21 March 2023

Dear Professor Hudson, Professor Hymel, and the Faculty Senate:

We, the students of the Department of Hydrology and Atmospheric Sciences, stand in solidarity with and in support of our faculty in their recent communication with you on March 14, 2023.

We echo their sentiments:

- *We support the work of the General Faculty Senate Committee for Safety of All, and thank them for their service in the goal of improving safety at the University of Arizona*
- *We express our concern for the reasons cited by the committee regarding its dissolution, as documented in the final committee letter sent to the Faculty Senate President dated 3 March 2023.*
- *We express our disappointment that this committee did not receive the full support and cooperation of the mentioned University of Arizona administrative units and personnel necessary to complete its important work.*
- *We request that the pending report of the external investigative agency PAX LLC be made fully available to the public upon its completion, for purposes of transparency.*
- *We request that the faculty senate consider inputting this statement into their record.*

Furthermore, we are greatly disappointed by the lack of respect from the university administration with regard to the efforts of the General Faculty Committee on University Safety for All and the victims of the October 5th shooting.

We respectfully call on the University Administration and President Robbins himself, rather than his spokespeople, to engage directly with and apologize to these groups, including this body of students.

In unity with our faculty, we will also communicate this letter to the same entities: the Dean of the College of Science, the President of the University of Arizona, and the Principal of PAX LLC.

Sincerely,

Claire Acke, Brandolyn Baeza, Samuel Dahl, Anik Das, Eden Harper, Lourdes M.
