

# NEW ACADEMIC PROGRAM – MAJOR Preliminary Proposal Form

# I. Program Details

- a. Name (and Degree Type) of Proposed Academic Program: Professional Science Masters (PSM) in Resilience Practice
  - i. **Emphases (if applicable):** International Development, Climate Adaptation and Mitigation, Water Conservation and Adaptation
  - ii. Academic Unit(s)/College(s): College of Social and Behavioral Sciences (SBS), in partnership with Arizona Institute for Resilience (AIR; nonacademic unit under RII)
- b. Desired CIP Code: 30.3301 (Sustainability Studies)
- c. Campus/Location(s): Main Campus and Arizona Online
- d. First Admission Term: Fall 2025
- e. **Primary Contact and Email:** Leona Davis, AIR Associate Director for Professional Education, leonafdavis@arizona.edu

# II. Executive Summary

This proposed professional masters program offers a new opportunity for interdisciplinary career training in the growing field of environmental and community resilience, sustainability, adaptation, and management. Students choose one of three specializations to gain necessary technical skills and real world experience: International Development, Climate Adaptation and Mitigation, or Water Conservation and Adaptation. This program leverages the expertise of Arizona Institute for Resilience (AIR) teaching and research faculty, as well as experienced professionals from AIR's many regional and international nonprofit, business, and government agency partners. As a professional program rather than a research-focused degree, the program will attract new students to the University of Arizona who will graduate with field experience and knowledge necessary to be highly competitive in careers related to environmental and community resilience, sustainability, and climate adaptation in public or private sectors.

Knowledge and skills for resilience and adaptation—the capacity to mitigate harm and adapt to change in planning and management — is increasingly desired by employers (Congressional Climate Jobs Fact Sheets, 2021; World Economic Forum, 2023; LinkedIn Green Jobs Report, 2023). Although this field intersects with environmental conservation, natural resources management, planning, and monitoring, employers across sectors have described a unique set of competencies necessary for resilience and adaptation careers (American Society of Adaptation Professionals, 2023; Association of Climate Change Officers, 2024; United Nations Environment Programme, 2024; Sustainability Education Accreditation Commission, 2024). This program's curriculum is informed by these key competencies. By the end of the program, students will be able to discern information from diverse sources for decision-making, design, implement, manage, and evaluate contextually appropriate resilience and adaptation strategies, practice collaborative and inclusive leadership, effectively communicate resilience and adaptation concepts and impacts, and navigate key organizations and career pathways specific to their professional goals.

This program partnership between AIR and SBS offers several unique advantages for both program sustainability and student experience. SBS's existing Transdisciplinary Programs unit provides robust student support infrastructure, while AIR's existing network of agency, industry, and non-profit partnerships offer opportunities for students to contribute to real resilience solutions, gain professional experience, and begin building their professional networks while in the program. This partnership also increases opportunities for program sustainability, as an increasing number of research funding opportunities include workforce development components. As one recent example, AIR is currently leading the proposal effort for a NSF Regional Resilience Incubation Incubator (R2I2), which would be leveraged to support education and training activities. As the University of Arizona pursues new strategic investments to support our mission, this program has high potential to bring new resources and students to the institution, as well as to prepare students to address our most pressing and complex challenges.

# **III.** Brief Program Description:

In today's rapidly changing world, the need for resilient communities and sustainable solutions has never been more pressing. The PSM in Resilience Practice, a professional science master's program jointly administered by the Arizona Institute for Resilience (AIR) and the College of Social and Behavioral Sciences (SBS), is designed to meet the growing demand for professionals with interdisciplinary skills to tackle complex sustainability, resilience, and adaptation challenges. This program leverages the knowledge of AIR's teaching and research faculty alongside experienced professionals from government agencies, nonprofits, and private sector organizations to provide current and practically applicable career training. Designed for flexibility and accessibility for current professionals or those aspiring to join the resilience workforce, this program offers 7.5 week courses, part-time or full time plans of study, inperson and online course options, and flexibility to complete the capstone project during the summer or academic year.

#### What students will learn:

- **Core Coursework:** Students gain a deep understanding of key environmental and community resilience challenges, systems and strategic thinking strategies, and collaborative leadership skills. Students explore resilience and adaptation concepts through the unique context of Arizona borderlands and the Sonoran Desert.
- Specialized Skills: Through project-based courses, students develop technical expertise in their
  chosen specialization area —International Development, Water Conservation and Adaptation,
  or Climate Adaptation and Mitigation. Students can select from a diverse range of electives to
  tailor their education to their career aspirations.
- Practical Experience and Network Building: Students engage in a 200-hour applied capstone
  project, collaborating with an organization or agency partner under faculty guidance. Through
  the capstone experience and engagement with other resilience professionals throughout the
  program, students begin building a professional network before graduation.

# **IV.** Program Rationale:

**The need for Green Workforce Development**: The World Economic Forum's 2023 <u>Future of Jobs report</u> shows that hiring for green roles consistently outpaced the overall hiring rate globally four years in a

row. The LinkedIn Green Jobs 2022 and 2023 Reports similarly showed "green hiring" outpaced general hiring in every region globally. Additionally, LinkedIn reported that while hiring for any job that required a "green skill" grew by 25%, the number of LinkedIn users with an environment- or sustainailibility-related skill on their resume only grew 12%, indicating a significant talent gap. In the U.S., the 2022 Bipartisan Infrastructure Law and Inflation Reduction Act together invested more than \$50 billion in climate change adaptation and climate resilience. As evidence of the job market impact of these policies, a Johns Hopkins study suggests that for every \$1B invested in flood resilience, 40,000 jobs are created. As a professional program, the PSM in Resilience Practice uniquely prepares students to enter the environmental resilience and sustainability sector immediately, to meet this workforce development need.

Reimaginging the Masters in Development Practice (MDP): The International Development specialization of this degree has been designed in collaboration with current and former faculty in the School of Geography, Development, and Environment (SGDE) in SBS, as a reimagining of the Master of Development Practice program, which they elected to end permanently in Spring 2024. This program started along with over 30+ MDP programs at other institutions with funding from the John D. and Catherine T. MacArthur Foundation in 2010. After years of success, the program became difficult to sustain without additional funding. Faculty and alumni from the MDP program have helped inform the PSM program design to keep what was successful (strong practitioner presence, project-based learning) and revise what was challenging (high total credit requirement, less accessible program format) in this new program.

Partnership for program sustainability: Offering this program through AIR and SBS leverages the partnerships and resources of both units to ensure program sustainability. Through SBS, students may access scholarships and necessary administrative support. Through AIR, this program can benefit from the expertise, student learning opportunities, and resource collaborations with partner agencies and organizations. Additionally, this program allows AIR to leverage research funding opportunities with goals related to education and workforce development to further support the program.

# V. Projected Enrollment for the First Three Years:

Year 1	Year 2	Year 3
15 Main Campus (MC)	35 MC (20 new, 15 continuing)	55 MC (25 new, 20
15 AZ Online (AZO)	35 AZO (20 new, 15	continuing)
	continuing)	55 AZO (25 new, 20
		continuing)

#### VI. Evidence of Market Demand:

There is an increasing demand for resilience professionals with interdisciplinary training in corporations, nonprofits, and government agencies. This demand is supported by high enrollment rates and job placement rates from similar professional master's programs related to resilience, sustainability and environmental management. The following data supports our enrollment projections.

Peer Program	Current total enrollment	Job placement rate*
University of Colorado, Boulder Master of the	200	90%
Environment (MENV) In person		
University of Michigan, MS in Environment and	128	89%
Sustainbility (MS) In person		
Arizona State University, Master of	103	96%
Sustainability Leadership (MSL) Online		
Yale University, Masters of Environmental	150	91%
Management (MEM) In person		
University of California Santa Barbara, Master	87	90%
of Environmental Science and Management		

<sup>\*</sup>Data from most recent alumni survey; does not include students pursuing further studies.

Although the term "resilience" is increasingly represented in job postings, especially in environmental management, public service, international development, and business (Global Council for Science and the Environment, 2022), it can be difficult to capture in workforce data as relevant positions span many different job sectors. The <a href="American Society for Adaptation">American Society for Adaptation</a> <a href="Professionals">Professionals</a> job board provides a snapshot of relevant job postings. Recent examples of target job titles include City of Tucson Chief Resilience Officer, positions in the State of Arizona Governor's Office of Resiliency, and US Department of the Interior Regional Climate Resilience Coordinator. Although these titles are not yet listed in Department of Labor (DOL) workforce data, several relevant titles in the DOL database below also reflect a growing job market.

Job Title/Area	Projected Job Openings 2021-2031	Percent requiring Masters	Median Wages (annual)	Projected Growth National	Projected Growth Arizona
Sustainability Specialist	114,200	39%	\$74,670	4% to 7%	19%
Climate Change Policy Analyst	7,800	13%	\$76,530	4% to 7%	12%
Chief Sustainability Officer	17,700	74%	\$179,520	-2%	7%

# VII. Similar Programs Offered at Arizona Public Universities:

#### University of Arizona, School of Natural Resources and the Environment:

MS in Water, Society & Policy (in person, plan to start online in Fall 2026): The Water Conservation and Adaptation specialization of this proposed program is similar to the Water, Society and Policy (WSP) program in that both are non-thesis masters degrees related to water. However, this proposed interdisiplinary program differs significantly in that none of the required coursework is related to water science or water policy, but rather systems thinking, stakeholder collaboration, social and community context, and water resilience project planning. Key faculty

from the WSP program have been consulted throughout the design process of this new program, to ensure unique content and minimize overlap in course content and learning objectives. We believe this would draw a unique student population.

**Arizona State University, School of Sustainability:** Master of Sustainability Solutions (in person), Master of Sustainability Leadership (online)

Similar to the proposed program, the Master of Sustainability Solutions (MSUS) and Master of Sustainability Leadership (MSL) are applied master's programs with a capstone component. However, the MSUS and MSL program do not offer specializations. The ASU MSL is significantly different from the proposed program in its emphasis on business and corporate sustainability. Core courses like Pathways to Sustainability and Strategic Sustainability and Leadership teach how to achieve sustainability goals within an organization.

**Northern Arizona University, School of Earth and Sustainability:** MS in Climate Science and Solutions (in person).

Similarly to the Climate Adaptation and Mitigation specialization of this proposed program, the MS-CSS at NAU emphasizes climate adaptation strategies, career development, and a professional internship (similar to the capstone). However, the NAU program differs in its emphasis on environmental science and business strategies. Although environmental science and business/management courses are offered as electives in the PSM in Resilience Practice, they are not part of the core coursework.

#### VIII. Resources

The launch of this program will be supported by funding provided to AIR from RII to initially hire and support administrative and instructional staff. The projected enrollment targets are modest compared to peer programs but realistic for this new program, and show that tuition revenue will exceed total program costs starting in Year 2. Additionally, SBS commits their existing administrative and student support staff and resources to support various administrative activities related to students, courses, and degrees. Although the campus tuition revenue-sharing model starting in FY26 has not yet been announced, this proposal assumes both AIR and SBS will receive sufficient funding from central administration to cover ongoing program administration costs, as detailed below. As projected enrollments are reached, this program will yield significant new revenues for the university.

# a. New staff (AIR):

**Associate Director of Professional Education**: This full-time position started in August 2023 and was funded for three years by RII to develop, design, and launch the PSM in Resilience Practice. **Professional Education Program Coordinator**: Full time position with initial funding from RII, to be hired Spring 2025.

**Capstone Coordinator and Career Advisor (capstone project support, career advisor)** Full time position with initial funding from RII, to be hired near the start date of the PSM program (Fall 2025).

Instructional faculty (AIR):

- **1 Associate and 1 Assistant Professors of Practice**, full-time: Provide instruction for core curriculum (4 courses), specialization curriculum (total of 3 courses), and capstone project supervision, to be hired in Spring 2025
- **3 Adjunct Instructors**, part-time: Qualified professionals to provide instruction for specialization courses (total of 3 courses or course equivalents per year), to be hired for Spring 2027

# Facilities & Equipment (AIR):

Includes: Classrooms, computer lab time, office space and furniture for staff, furnishings for student common space, computers for faculty/staff

## b. Estimate total expected cost:

The total expected cost of the program includes the staff and faculty salaries and benefits, as well as the equipment and facilities needed for the students, faculty, and staff, as described below. The costs are estimated assuming that the core and specialized curriculum and capstone project supervision will be taught by instructional faculty based in AIR, and additional electives will be taught by departments across campus.

# Costs detailed below to be covered by AIR

Year 1 (FY26):

Associate Director: \$115,000 + 31.9% ERE = \$151,685 Program Coordinator: \$60,000 + 31.9% ERE = \$79,140

Associate Professor of Practice A (full time): \$90,000 + 31.9% ERE = \$118,710 Assistant Professor of Practice B (full time): \$70,000 + 31.9% ERE = \$92,330

Capstone Planning Lab co-instructors (3 per course; 3 sections):  $$1,000 \times 9 = $9,000$  AIR Operations staff (providing communications, IT, administrative support): \$50,000

Marketing: \$50,000 Equipment: \$15,000 Facilities: \$20,000

NPSMA Affilitation Annual Fee: \$525

**YEAR 1 TOTAL: \$585,853** 

Year 2 (FY27) and ongoing, in addition to costs noted above:

Year 2: Adjunct Instructors (total of 3 courses): \$8,000 per course = \$44,000

Year 2: Capstone Coordinator and Career Advisor (full time): \$60,000 plus 31.9% ERE = \$79,140

Year 2: Capstone Showcase event expenses: \$1,000

Year 2: Guest professional speaker honorariums: \$100 x 15 speakers = \$1,500

YEAR 2 and ongoing annual total: \$725,319

# Costs detailed below to be covered by SBS:

Business Office staff time (tuition and scholarship transactions)

Administrative staff time (course administration)

Student support staff time and materials (scholarship administration, convocation events, student petitions and appeals, enrollment issues, etc.)

Y1 estimated operating cost: \$90,000

Y2 and beyond: \$30,000 additional per year as the program grows

# c. Estimate total expected revenue of the program:

The total expected revenue of the program is based on 30 new students total enrolled in year 1, 40 new students enrolled in year 2, and 50 new students enrolled in year 3. As this is a two-year, 33-unit program, the calculations below reflect 16-17 credits per year per student, and 30 total students in Y1, 70 in Y2, and 110 in Y3. Tuition revenue is based on the Fall 2024 graduate tuition rate of \$1,053.00 per credit hour for AZ resident Main Campus tuition, and \$750 per credit for Arizona resident online tuition.

Pending the announcement of a new campus-wide tuition revenue-sharing model for FY26, we anticipate a revenue split between central campus, SBS, and AIR, to at least cover program administration costs as described above in Year 3 and beyond. For Year 1, AIR is prepared to make up the Y1 revenue shortfall with internal funds.

	Year 1	Year 2	Year 3	Year 4	Year 5
<b>Total Revenue</b>	\$513,810	\$1,036,725	\$1,325,205	\$1,613,685	\$1,902,165
Total Costs	\$666,874	\$845,348	\$886,961	\$928,806	\$970,740
Net Revenue	-\$153,019	\$191,377	\$438,244	\$684,879	\$931,425

- IX. **Required Signatures** (the following should be included in the notification memo to campus after ABOR approval):
  - a. Program Director/Main Proposer:

i. Signature:

ii. Name and Title: Leona Davis, AIR Associate Director for Professional Education

iii. Date: September 12, 2024

Leonth

b. Managing Unit/Department Head:

i. Signature: Shannell. Collige

ii. Name and Title: Sharon K. Collinge, Director, Arizona Institute for Resilience

iii. Date: September 12, 2024

c. College Dean/Associate Dean:

i. Signature:

- ii. **Name and Title:** Amy C. Kimme Hea, Senior Associate Dean, Academic Affairs and Student Success
- iii. Date: September 12, 2024

# New Academic Program PEER COMPARISON

Select two peers (if possible/applicable) from 4-year <u>AAU members</u>, and/or other relevant institutions recognized in the field. The comparison programs may have a different degree type and/or title as the proposed UA program. Details of the proposed UA program must be consistent throughout all proposal documents.

# Additional questions:

1. How does the proposed program align with peer programs? Briefly summarize the similarities between the proposed program and peers, which could include curriculum, overall themes, faculty expertise, intended audience, etc.

Like the proposed PSM Resilience Practice, the ASU MSL and CU Boulder MENV are master's programs intended for students who want to join the environmental/ sustainability/ resilience workforce, and who are not likely to be pursuing research-intensive or academic careers. These programs require that students complete a Capstone project with a partnering organization in small student teams, rather than complete a research thesis, and emphasize professional/applied learning in their curriculum.

2. How does the proposed program stand out or differ from peer programs? Briefly summarize the differences between the proposed program and peers, which could include curriculum, overall themes, faculty expertise, intended audience, etc.

The ASU MSL is significantly different from the proposed program in its emphasis on business and corporate sustainability. Designed especially for professionals looking to upskill or bring added value to their company, core courses like Pathways to Sustainability and Strategic Sustainability and Leadership teach how to achieve sustainability goals within an organization. There are no specializations offered.

<sup>\*\*</sup>Data obtained through program alumni career destination reports.

The CU Boulder MENV is significantly different in that it is a more time-intensive cohort-based program (48 credits over two years), offered in-person only, except for the Sustainability in the Outdoor Industry specialization which is offered online. None of the five MENV specialization areas overlap with the specialization areas in this proposed PSM program.

3. How do these differences make this program more applicable to the target student population and/or a better fit for the University of Arizona?

The interdisciplinary faculty and institutional relationships beyond campus that Arizona Institute for Resilience brings to this program set it apart from comparable professional masters programs. These relationships allow for having practitioner-instructors, supported by faculty, working directly with students in the specialization courses and in capstone projects, resulting in direct connections to agencies and organizations in the resilience job sector. Additionally, this program aims to highlight resilience challenges and best practices from our unique geographic region as key case studies for student learning; from proximity to the national border and tribal nations, extreme heat risks, and desertification, to leading municipal stormwater infrastructure strategies, the adaptive capacities of desert plants and animals, and our community's diverse cultural influences. AlR's existing partnerships and the unique learning opportunities from our region position us well to provide excellent applied learning opportunities related to the intersections of resilience and international development, climate adaptation and mitigation, and water conservation and adaptation.

Our proposed program strives to maximize accessibility, to offer high quality professional education to students who have already begun their careers. For this reason, we plan to offer all courses owned by the program as 7.5 week classes with in-person and online options, as well as options to complete the program more intensively in 18 months or less intensively in 4-6 semesters. Additionally, students will have options to do a summer or academic year capstone, either in-person or virtually, providing flexibility to complete the program in the way that works best for the student's life and career goals.

	HWRS573 Hydrology for Water Resources Management (3 units)
	HWRS577 Advanced Topics in Water Resource Economics and Policy (3
	units)
Research methods, data analysis, and methodology	
requirements (Yes/No). If yes, provide description.	Yes- Students are required to take RESI 501 which covers integration and
	analysis of environmental data from diverse sources, and RESI 502 which
	covers systems-based methods of problem analysis and solution design.

To be used once preliminary proposal has been approved

ZINA	
	Additionally, the Capstone project requires systematic investigation of a
	resilience issue, novel synthesis of information, and evaluation of
	strategy effectiveness.
Internship, practicum, applied course requirements (Yes/No). If yes, provide description.	Yes, students complete 5 units of Capstone, which is an applied learning experience completed with supervision from a community partner. The Planning Lab course prior to the Capstone experience provides learning surrounding the project, project context, and the partnering organization, and supports students in developing project plans in teams. The Communication Lab following the capstone emphasizes communication of capstone project impact to diverse audiences, including the creation of a communication product (e.g. poster, slideshow, website).  RESI 598a Capstone Planning Lab (2 units)  RESI 598b Capstone (5 units)
	RESI 598c Capstone Communication Lab (1 unit)
Master thesis or dissertation required (Yes/No). If	No
yes, provide description.	
Additional requirements (provide description)	None
Minor options (as relevant)	No required minor.

<sup>\*</sup>Emphases are officially recognized sub-specializations within the discipline. ABOR Policy 2-221 c. Academic Degree Programs

Subspecializations requires all undergraduate emphases within a major to share at least 40% curricular commonality across emphases (known as "major core"). Total units required for each emphasis must be equal. Proposed emphases having similar curriculum with other plans (within department, college, or university) may require completion of an additional comparison chart. Complete the table found in Appendix B to indicate if emphases should be printed on student transcripts and diplomas.

II. CURRENT COURSES—using the table below, list all existing courses included in the proposed major. You can find information to complete the table using the <u>UA course catalog</u> or <u>UAnalytics</u> (Catalog and Schedule Dashboard> "Printable Course Descriptions by Department" On Demand Report; right side of screen). If the courses listed belong to a department that is not a signed party to this implementation request, upload the department head's permission to include the courses in the proposed program and information regarding accessibility to and frequency of offerings for the course(s). Upload letters of support/emails from department heads to the "Letter(s) of Support" field on the UAccess workflow form. Add or remove rows to the table, as needed.

<sup>\*</sup>All courses listed below are to be included in elective offerings, none are required courses

IZC	Course prefix and number (include cross-listings)	Units	Title	Pre- requisites	Modes of delivery (online, in-person, hybrid)	Dept signed party to proposal? (Yes/No)
•			No existing courses in the proposed major			

# To be used once preliminary proposal has been approved

II. NEW COURSES NEEDED – using the table below, list any new courses that must be created for the proposed program. If the specific course number is undetermined, please provide level (i.e., CHEM 4XX). Add rows as needed.

Course prefix and number (include cross- listings)	Units	Title	Pre-requisites	Modes of delivery (online, in-person, hybrid)	Status*	Anticipated first term offered	Dept signed party to proposal? (Yes/No)
RESI 501	3	Diverse Environmental Knowledges	none	7.5wk; In-person and online sections	D	Fall 1 2025	
RESI 502	3	Systems Thinking	none	7.5wk; In-person and online sections	D	Fall 2 2025	
RESI 505	1	Sonoran Desert Resilience	none	7.5wk; In-person and online sections	D	Fall 2 2025

III. FACULTY INFORMATION- complete the table below. If UA Vitae link is not provided/available, add CVs to a Box folder and provide that link. UA Vitae profiles can be found in the <u>UA directory/phonebook</u>. Add rows as needed. NOTE: full proposals are distributed campus-wide, posted on committee agendas and should be considered "publicly visible". Contact <u>Office of Curricular Affairs</u> if you have concerns about CV information being "publicly visible".

Faculty Member	Involvement	UA Vitae link or Box folder link
Professor of Practice 1	Teach RESI505, RESI601, RESI611, RESI598a (multiple sections),	To be hired
	RESI598b (capstone mentorship), Student mentorship	
Professor of Practice 2	Teach RESI502, RESI600, RESI621, RESI598a (multiple sections),	To be hired
	RESI598b (capstone mentorship), Student mentorship	
Adjunct instructors	Teach RESI602, RESI612, RESI622	Field professionals in the area of expertise;
		to be hired
Dan Ferguson (AIR)	Teach RESI501	https://profiles.arizona.edu/person/dferg

IV. GRADUATION PLAN – provide a sample degree plan, based on your program that includes all requirements to graduate with this major and takes into consideration course offerings and sequencing. *Undergraduate programs: please complete <u>Addendum D: 4-Year Plan for Degree Search</u>. Use generic title/placeholder for requirements with more than one course option (e.g., Upper Division Major Elective, Minor Course, Second Language, GE Tier 1, GE Tier 2). Add rows as needed.* 

Five possible plans of study have been created for this program, with options for students to start in Fall or Spring semester, and to complete their capstone by working close to full time over the summer, or part time over the academic year. Two of these plans are outlined below.

# To be used once preliminary proposal has been approved

Fall start/ summer capstone

Semester 1		Semester 2		Semester 3		Semester 4

# THE UNIVERSITY OF ARIZONA

# ADDITIONAL INFORMATION FORM

# To be used once preliminary proposal has been approved

V. LEARNING OUTCOMES AND CURRICULUM MAP - Complete these tables as a summary of the learning outcomes from your assessment plan and an overview of where learning outcomes are addressed in the program. Use the examples below as models and refer to the explanations beneath each table. Additional resources are available from the University Center for Assessment, Teaching and Technology.

**Learning Outcomes - PSM Resilience Practice** 

Learning Outcomes - PSM Resilience Practice
Learning Outcome #1: Students will evaluate and summarize environmental information from diverse sources to discern best available
information for resilience decision-making.
Concepts: Environmental knowledge, accuracy and validity, integration of environmental, historical, and sociocultural data, cultural
bias, risk and vulnerability, cultural humility, stakeholders, environmental communication
Competencies: Interpret environmental information from diverse sources, including environmental science data, local and cultural
knowledge, and stakeholder risks and vulnerabilities; evaluate information for relevancy, accuracy, validity, and bias; summarize best
available information to be used in decision-making
Assessment Methods: Discussion posts and assignments (direct), student post-program survey (indirect)
Measures: Instructor grading of discussion posts and assignments, responses to post-program survey
Learning Outcome #2: Students will practice collaborative leadership strategies to promote inclusive and equitable planning and management.
Concepts: Group decision making, shared leadership, stakeholder collaboration, meeting facilitation, active listening
Competencies: Identify leadership strengths and weaknesses; facilitate complex conversations; assess stakeholder needs and
limitations; generate a collaboration plan; evaluate a collaborative process using equity indicators
Assessment Methods: Discussion posts and assignments (direct), student post-program survey (indirect)
Measures: Instructor grading of discussion posts and assignments, responses to post-program survey
Learning Outcome #3: Students will design feasible and appropriate environmental resilience and adaptation projects, including plans for the
implementation, management, monitoring and evaluation.
Concepts: Vulnerability and risk, regional and cultural context, systems thinking, socioenvironmental systems, adaptation and resilience
planning, project planning and management, program monitoring and evaluation
Competencies: Apply systems thinking and adaptation principles to design a culturally-appropriate resilience project plan, including
implementation, management, monitoring and evaluation
Assessment Methods: Course assignments and projects (direct), student post-program survey (indirect), capstone supervisor survey
(indirect)
Measures: Instructor grading of discussion posts and assignments, responses to post-program survey

To be used once preliminary proposal has been approved

**Learning Outcome #4:** Students will effectively communicate concepts of climate change, adaptation, and resilience related to environmental and human systems, to explain the methods, outcomes, and impacts of a resilience strategy.

**Concepts:** Environmental science translation, communication for diverse audiences, culturally appropriate communication, environmental storytelling

**Competencies:** Define resilience and adaptation; assess an audience; apply elements of storytelling; employ appropriate format and language; communicate outcomes and impacts; incorporate feedback

**Assessment Methods:** Student assignments and final projects (direct), student post-program survey (indirect), capstone supervisor survey (if applicable, indirect)

Measures: Instructor grading of assignments and final projects, responses to post-program survey

**Learning Outcome #5:** Students will demonstrate and apply knowledge of professional sectors and career pathways related to environmental and community resilience, sustainability, and adaptation.

Concepts: Resilience and adaptation career sectors; Resilience and adaptation career pathways

**Competencies:** Describe resilience-related professional sectors and careers, identify specific organizations and agencies directly involved in students' target resilience job sector; assess possible career paths in students' target career sector, build professional relationships within target career sector

Assessment Methods: Discussion posts and assignments (direct), alumni survey (indirect), student post-program survey (indirect)

**Measures:** Instructor grading of discussion posts and assignments, post-graduation career destinations, responses to post-program survey

Explanation: **Concepts** are the topics that students will learn in the program. **Competencies** are the skills they will learn. A **learning outcome** is their ability to apply the skills to the topics, or to use the skills and the topics together, in an observable way. The **assessment method** is where students will demonstrate the learning outcome, and a **measure** is how data will be pulled from the assessment method. Include both a direct and indirect assessment method and measurement for each learning outcome. Competencies and the learning outcomes need to reflect higher level learning: consider using verbs from the Application, Analysis, Synthesis, and Evaluation columns from this list when writing learning outcomes: <a href="https://arizona.app.box.com/s/orx6coex8607hlmenrgl7dznhzjicpit">https://arizona.app.box.com/s/orx6coex8607hlmenrgl7dznhzjicpit</a>. We recommend 3-5 Learning Outcomes for a degree program.

To be used once preliminary proposal has been approved

# **Curriculum Map**

	RESI	RESI							
	501	502	505	598a	598b	598c	600	601/611/621	602/612/622
LO #1: Students will evaluate and summarize environmental information from diverse sources to discern best available information for resilience decision-making.	I,R	R	R	R	M			R	R
LO #2: Students will practice collaborative leadership strategies to promote inclusive and equitable planning and management.	I,R	R	R	R	R		M		R
LO #3: Students will design feasible and appropriate environmental resilience and adaptation projects, including plans for the implementation, management, monitoring and evaluation.		I,R		R	R		R	R	М
LO #4: Students will effectively communicate concepts of climate change, adaptation, and resilience related to environmental and human systems, to explain the methods, outcomes, and impacts of a resilience strategy.	ı		R		R	М	R		R
LO #5: Students will demonstrate and apply knowledge of professional sectors and career pathways related to environmental and community resilience, sustainability, and adaptation.	ı		R	R	R		R	M	

Explanation: The curriculum map lists the required courses for the program and indicates where each LO will be introduced (I), reinforced (R), and mastered (M). This is important to show that you are including adequate teaching of the skills and concepts to support the LOs. Each row (LO) should have at least one I, R, and M in it. Usually (but not always) there is more than one R. Usually (but not always) there is only one I and one M. Generally, Is come first, followed by Rs, and Ms are last. Each column (class) should have at least one letter in it, but not every box needs to be filled in

# To be used once preliminary proposal has been approved

VII. PROGRAM ASSESSMENT PLAN- using the table below, provide a schedule for program evaluation 1) while students are in the program and 2) after completion of the major. Add rows as needed. Delete EXAMPLE rows.

Assessment Measure	Source(s) of Evidence	Data Collection Point(s)
Program Pre-post survey	Student Survey responses	In the first semester and at graduation
Graduate Career Destinations	Alumni Survey	Annually for alumni starting one year post
		graduation
Capstone Experience Survey	Students and Capstone partners	After the completion of each student
		capstone project
Annual Academic Program Review (APR)	Program quality, student learning outcomes	Annually in spring
Periodic Institute Review for AIR	Program success and sustainability	Approximately every 7 years, as required
	measures, included in broader Institute	by Research, Innovation and Impact (RII)
	review for AIR	

VIII. ANTICIPATED STUDENT ENROLLMENT-complete the table below. What concrete evidence/data was used to arrive at the numbers?

	5-YEAR PROJECTED ANNUAL ENROLLMENT											
	1 <sup>st</sup> Year	2 <sup>nd</sup> Year	3 <sup>rd</sup> Year	4 <sup>th</sup> Year	5 <sup>th</sup> Year							
Number of	30	70	90	110	130							
Students	15 Main Campus (MC) and 15 AZ Online (AZO)	35 MC (20 new, 15 continuing) 35 AZO (20 new, 15 continuing)	45 MC (25 new, 20 continuing) 45 AZO (25 new, 20 continuing)	55 MC (30 new, 25 continuing) 55 AZO (30 new, 24 continuing)	65 MC (35 new, 30 continuing) 65 AZO (35 new, 30 continuing)							

Data/evidence used to determine projected enrollment numbers:

#### To be used once preliminary proposal has been approved

This masters program design has been inspired by other successful environmental professional masters programs, described below, which regularly enroll over 100 students. Our strategy to reach target enrollment includes hiring a Program Coordinator whose role would include marketing and recruitment, and budgeting annual funds to run digital marketing campaigns for this program.

Peer Program	<b>Current total enrollment</b>	Job placement rate*
University of Colorado, Boulder Master of the Environment (MENV) In person	203	90%
University of Michigan, MS in Environment and Sustainability (MS) In person	115	89%
Arizona State University, Master of Sustainability Leadership (MSL) Online	103	96%

<sup>\*</sup>Data from most recent alumni survey; does not include students pursuing further studies.

IX. ANTICIPATED DEGREES AWARDED- complete the table below, beginning with the first year in which degrees will be awarded. How did you arrive at these numbers? Take into consideration departmental retention rates. Use <a href="National Center for Education Statistics College">National Center for Education Statistics College</a>
Navigator to find program completion information of peer institutions offering the same or a similar program.

PROJECTED DEGREES AWARDED ANNUALLY								
	1 <sup>st</sup> Year	2 <sup>nd</sup> Year	3 <sup>rd</sup> Year	4 <sup>th</sup> Year	5 <sup>th</sup> Year			
Number of	0	21	33	41	49			
Degrees								

Above table assumes degrees from both Main Campus and Arizona Online programs.

Data/evidence used to determine number of anticipated degrees awarded annually: Based on a UAIR Analytics Dashboard query of students in masters degree programs in the Colleges of Science, Social and Behavioral Sciences, and Agriculture, Life and Environmental Sciences who started during Fall 2017-Fall 2020, the two year completion rate was 70.9% and the three year completion rate was 84.7%.

X. SUPPORT FACULTY/STAFF – please list name, title, and email for applicable positions below.

Lead Academic Advisor: Faculty to be hired, AIR

Director of Graduate Studies: Leona Davis, AIR / Amy Kimme-Hea, SBS

Graduate Coordinator: Staff to be hired, AIR

# Course Use/Collaboration/Concern Form

Please use this form to notify other colleges that your proposed new program intends to use course(s) under their ownership; has identified potential avenues for interdisciplinary collaboration; and/or wants to hear their concerns about the creation of this program.

Note: Requesting college should provide this request to leadership in unit who owns courses. Responding unit should respond within 10 business days from receipt. Lack of response after the 10 business days is presumed approval.

#### FOR REQUESTING COLLEGE:

l.	Initiating College: College of Social and Behavioral Sciences (academic home), in partnership with
	Arizona Institute for Resilience (AIR)

- II. Representative(s) making the request: Leona Davis, AIR Associate Director of Professional Education
- III. Planned proposed program: MS in Resilience Practice
- IV. Planned program start date: Fall 2025
- V. Courses planned to be included, belonging to college / departments: All required courses of this program are new (not yet in the catalog), and will be taught by AIR faculty. We are currently compiling our list of electives from other departments.

Course Use Collaboration Forms were sent to all colleges/departments with courses listed as electives in the proposed MS in Resilience. Many of the requests did not receive responses within ten days, so according to the form they are presumably approved. Below is an inventory of the contacts and dates that colleges/departments were contacted for signature. All requests were sent via email.

Department/College	Contact(s)	Date of Request
College of Science	Jeremiah Hackett,	Initial Email: February 7 <sup>th</sup>
	Associate Dean, Graduate	Reminder: February 20 <sup>th</sup>
	and Postdoctoral Affairs	
Law (LAW)	Jason Kreag, Associate	Initial Email: January 25 <sup>th</sup>
	Dean Reminder: January	
See update below	Karen Kowalski, Associate	February 9 <sup>th</sup>
_	Dean	
Chemical and	Kimberly Ogden,	Initial Email: February 1st
Environmental Engineering	Department Chair	Reminder: February 12 <sup>th</sup>
(BE & CHEE)	Kelly Potter, Associate Dean	
	Murat Kacira, Interim Head	

#### All communication and attached collaboration forms are attached to this document.

Update 11/4/24: Please disregard communications related to LAW courses. These have since been removed from the list of possible electives.

HAS\_Course Use Collaboration Form.docx;

#### Hi Jeremiah,

I wanted to bring this request below back to the top of your inbox. We are requesting the use of HAS courses as electives in a proposal we are putting forth for a MS in Resilience Practice, in partnership with SBS as the academic home. These would be among about 50 total electives, as the vision is a very interdisciplinary program, so we do not expect significant increases in enrollment for any of these courses due to including them here.

I have already been in touch with Chris and Ty to get permission at the department level, and we just need your signature as Associate Dean for Graduate Affairs in College of Science. Please let me know if you have any questions.

Thanks, Leona

From: Davis, Leona - (leonafdavis)

Subject: Signature requested - HAS courses as electives in new MS program

Hi Dr. Hackett,

I am writing to ask for your signature on the attached form, in your role as Associate Dean for Graduate Affairs in College of Science, which requests the use of three HWRS graduate courses as electives in a new masters program we are proposing (MS in Resilience Practice), administered by Arizona Institute for Resilience with SBS as the academic home. I have already floated this request to Chris Castro and Ty Ferre in HAS, copied here, who have given their permission to use the courses listed on this form.

We would like to request your signature (electronic/typed signature OK) at your convenience. Please let me know if you have any questions.

Thank you,

Leona

#### Good afternoon Jason and Karen,

I just wanted to bring this email back to the top of your inbox, as we are finalizing our MS program proposal. If you are willing to allow the LAW courses listed to be used as electives in a new academic program, please sign and return. If not, please just let me know and I won't continue to bug you. If this request should be directed to someone else, please let me know or feel free to forward.

Thank you, Leona

**Subject:** Re: Request to include Law courses as electives in new program proposal

Hi Dr. Kreag and Dr. Blair,

Apologies for the multiple emails- I learned this week of the necessary form for requesting formal permission to use other departments' courses in new academic programs. That form is attached, and includes the same courses listed in my original email below.

Please complete this form indicating permission or not for each course listed, and with Associate Dean Kreag's signature. If you do not wish to permit students from an outside program in any of these courses, you are welcome to just give that response and no need to complete the form.

Thanks so much for your consideration of the use of these courses, and for your support in this administrative step in the process. Let me know if you have any questions.

Best, Leona

**Subject:** Request to include Law courses as electives in new program proposal

Hi Dr. Kreag and Dr. Blair,

My name is Leona Davis and I work with <u>Arizona Institute for Resilience</u> (AIR) on campus. I'm writing to you because we are submitting a proposal for a new professional masters program in Resilience Practice, to prepare students for careers in environmental and community resilience, adaptation, and sustainability. This proposed program would be managed/taught by our AIR faculty with SBS as the academic home, and would offer emphasis areas in International Development, Climate Adaptation and Mitigation, and Water Adaptation and Conservation. If our proposal is successful, this program would start in Fall 2025 on Main Campus, and we would start an Arizona Online version the following year.

We are interested to offer any/all of the Law courses included in the MLS - Environmental Law emphasis listed below, as electives within this program, with your permission. These would be among 30-40 total elective courses offered, and we are aiming to enroll 30-40 students per cohort, so would not expect more than a few additional students per course per year as a result of offering these electives.

- LAW 519\* The Ethics & Economics of Environmental Policy
- LAW 545 Applied Environmental Law
- LAW 559\* Public International Environmental Law

Permission is required by ABOR for us to include electives in our program proposal. If someone else in the Law College is better positioned to grant this permission, please feel free to forward this email.

Additionally, if there are any other courses that you would recommend as relevant electives, feel free to suggest them. If you would like to learn more about this program or have other ideas about collaboration, I'm always happy to talk.

Thank you, Leona

#### Hi Kim and all,

I wanted to circle back to this request and see if you were able to get feedback from faculty. Murat replied separately and suggested a few additional relevant BE courses, so I am attaching a revised version of this form with those additions. If you would be able to reply by the end of this week, I would appreciate it.

Thanks for your consideration, and please reach out with any questions. Leona

**Subject:** Request to use BE and CHEE courses as electives in new MS program

Hi Associate Dean Potter, Dr. Ogden, and Dr. Murat,

This is Leona Davis with <u>Arizona Institute for Resilience</u> (AIR), nice to e-meet you. I'm writing to you because we are putting forth a proposal for a new professional masters program in Resilience Practice, to prepare students for careers in environmental and community resilience, climate adaptation, and sustainability, and interested to include some grad BE and CHEE courses among our elective offerings in this interdisciplinary program, with your permission. These courses would be especially relevant for students in the Water Adaptation and Conservation emphasis of our proposed program. If our proposal is successful, this program would start in Fall 2025 on Main Campus, and we would start an Arizona Online version the following year.

The attached form is required for granting this permission, and required to be signed by the Dean or Associate Dean. If all courses are restricted to students in your programs, feel free to give that response via email and there is no need to complete the form. Please share this request with any others in your units who may need to review.

Thank you all for your consideration, and please let me know if you have any questions.

Best,

Leona

#### Subject: Arizona Online Support for the Resilience Practice MS and Certificates

I am writing in support of the Master of Science in Resilience Practice program and certificates: Water Conservation & Adaptation; Climate Adaptation & Mitigation; and International Development & Resilience. This strategic initiative is a timely response to the dynamic shifts in higher education and addresses the evolving needs of our student body and the broader workforce.

Our analysis indicates that the Resilience Practice MS and certificates are poised to be significant and valuable additions to our existing academic offerings. Historical market trends and current demands in this field underscore the relevance and potential success of this program. The introduction of this degree and certificates is expected to draw a diverse group of motivated students, keen on expanding their expertise and competencies in this critical area of study.

Moreover, the online delivery model of this program is particularly suited to meet the needs of post-traditional learners. It offers unparalleled flexibility, allowing students to balance their educational pursuits with personal and professional commitments. By providing an accessible and adaptable learning environment, we are enabling these learners to achieve their educational aspirations and career objectives more effectively.

To ensure the successful launch and sustainability of the Resilience Practice MS program and certificates, Arizona Online is committed to offering comprehensive support in both planning and implementation phases. This will include resources for curriculum development, marketing strategies, and student support services, ensuring that the program not only attracts but also retains a high caliber of students.

In conclusion, the introduction of the Resilience Practice MS program and certificates represents a strategic step forward for Arizona Online, aligning with our mission to provide high-quality, accessible education.

Sincerely

**Caleb Simmons, Ph.D. MBA**Executive Director, Arizona Online

February 15, 2024

Dear Curricular Affairs and Committees:

It is with enthusiasm that the College of Social and Behavioral Sciences supports the addition of the MS in Resilience Practice, as well as the certificate programs. This support includes housing the MS, certificates, and courses under the Social and Behavioral Sciences Admin academic department (0443). This support also includes approval for these academic plans to include elective courses from AIS, ANTH, LAS, GEOG, GIST, PA, HRTS, MENA, and COMM subjects.

For questions regarding this support, please contact Debbie Bamford at dfeehs@arizona.edu.

Sincerely,

Amy Kimme Hea

Associate Dean, Academic Affairs and Student Success

September 9, 2024

To: Arizona Board of Regents

From: Tim Born, Ph.D., President, National Professional STEM Master's Association

RE: Proposed PSM program in Resilience and Adaptation

Dear Members of the Arizona Board of Regents,

The Affiliation Committee for the National Professional STEM Master's Association (NPSMA) recently reviewed materials submitted for a proposed Masters program in Resilience at the University of Arizona. We have determined that the proposed program meets the requirements of a Professional Science Master's (PSM) program based on the submitted materials.

The program will need to form an industry advisory board once it has been formally approved by the Arizona Board of Regents, but all other criteria have been met. Therefore, I can inform you that the program in Resilience and Adaptation will be approved as a PSM program once it has been fully approved internally.

Please feel free to contact me if you have any questions about affiliation with the NPSMA or status as a PSM program.

Take care,

Timothy L. Born, Ph.D.

May 15, 2024

To: Leona Davis

RE: Arizona Online Program Proposal

Thank you for your interest in launching your program, Resilience Practice MS + 3 graduate certificates (Water Adaptation and Conservation, Climate Adaptation and Mitigation, International Development and Resilience), via the Arizona Online campus.

Arizona Online has thoroughly evaluated your program proposal, data, and supporting documents. We are pleased to inform you that your program was selected for Arizona Online investment (development and marketing) with expected launch date of Fall 2025. Please note that the investment will take place at the degree level, and the graduate certificates will be embedded within the development and marketing of the MS program.

#### Summary of Committee's Findings:

This would be a new master's degree that would also produce three certificates - thus the market analysis reports contain different program names in the industry. Enrollment projections are based on research into similar programs that are in-person. Lightcast reports demonstrate notable increase in jobs related to sustainability. The number of master's degree completions related to Sustainability Studies grew 45% from 2018-2022. For the proposed graduate certificates and MS program emphases, Lightcast reports a 13.1% increase in jobs related to Water, Wetlands, and Marine Resources Management, a 6.6% increase in jobs related to International/Globalization Studies, and a 2.4% increase in jobs related to Environmental/Natural Resources Management and Policy. Funds are available to hire staff and faculty to manage this program. This proposed professional master's program supports the strategic goals of University of Arizona by providing robust student support both during the program and in transition to the workforce (Pillar 1: Wildcat Journey), training professionals equipped to work within complex environmental and social dynamics (Pillar 2: Grand Challenges), leveraging the unique learning opportunities of the Sonoran Desert, Tucson, and Arizona (Pillar 3: Arizona Advantage), expanding global reach through a fully online program and through international partners in the International Development and Resilience emphasis (Pillar 4: Arizona Global), and optimizing the many opportunities and efforts of the University through interdisciplinary collaboration (Pillar 5: Institutional Excellence). AZO investment is requested to develop 13 courses.

#### **Rubric Scores:**

Enrollment Projections	21/25
Faculty	18/20
Curriculum Map & Course Carousel	15/15
Student Success Initiatives	15/15
Mission Alignment	14/15
Development Budget	10/10

Here's what to expect in the coming weeks:

- You will meet with your Program Manager, Elena Chabolla, & College of Social and Behavioral Sciences to finalize the curriculum roll-out plan and online course development schedule for your program
- Memorandum of Agreement (MOA) will finalize Arizona Online's investment in your program
- As the planning process progresses, your Program Manager will connect you with additional Arizona
   Online resources including student recruitment, enrollment, marketing, and advising to help prepare your program for launch

Your Program Manager will be following-up with our Onboarding Checklist to provide you with an overview of the development process. If you have questions, please contact Neda or me.

We look forward to working with you and are excited to make your program available to our Online students.

Thank you and welcome to Arizona Online!

To Whom It May Concern:

This letter is in support of the University of Arizona, Professional Science Masters (PSM) in Resilience Practice, Water Conservation and Adaptation specialization. The proposed program is administered by Arizona Institute for Resilience (AIR) in partnership with University of Arizona's College of Social and Behavioral Sciences as the academic home.

*Background.* I serve as the director of the University of Arizona's Water, Society & Policy (WSP) non-thesis Master's Degree Program, housed in the School of Natural Resources and the Environment. I am also AIR Director for Science Translation and Outreach.

I have reviewed the curriculum for the PSM in Resilience Practice, Water Conservation and Adaptation specialization. While students in the WSP degree program are certainly exposed to concepts like resilience and adaptation, and to water conservation practices, the niche that the PSM in Resilience Practice is aiming for with its Water Conservation and Adaptation specialization—one that caters to an emerging need for conservation managers in Arizona's cities and towns and that emphasizes the effects of climate change on water management practices—is distinct from the water policy niche that attracts students to the WSP program. Moreover, the core curriculum of the PSM in Resilience Practice, Water Conservation and Adaptation specialization steers clear of courses environmental and natural resource sciences, policy, law, and economics—which are the mainstays of the WSP core curriculum. Having both of these non-research thesis programs at the University of Arizona will provide mutual benefit to our water-related degree programs and enhance our abilities to attract the best and brightest students to learn ways to solve ongoing and emerging water issues in Arizona and the world. Consequently, I support the development and implementation of this program.

If you have questions or concerns, feel free to contact me at one of the numbers or addresses, below.

Sincerely,

Jugg M. J

Gregg M. Garfin, Professor and Extension Specialist Office: 520-626-4372 Cell Phone: 520-591-9543

#### NEW ACADEMIC PROGRAM – MAJOR Supplemental Info Form

NOTE: This is being added to the proposal after committees, including but not limited to Graduate Programs Executive Review (GPERC) and Graduate College Academic Administrator's Council (GCAAC) viewed and commented on the document. Below are their questions and the responses given by the proposing department/college.

The Graduate Programs Executive Review Committee has had a chance to review your proposal and there are several key points they would like you to address. They are as follows:

- Is it correct that 2 full-time faculty need to be hired to teach the core curriculum? This is potentially problematic as we cannot evaluate the rigor of the program
  - This proposed program plan includes hiring two new teaching faculty members, who would each teach Main Campus and AZO sections of 2 courses per semester, in addition to acting as faculty mentors for capstone project teams, student mentoring responsibilities, and service responsibilities (meetings, administrative coordination) with AIR and SBS. Job descriptions are attached to provide details on minimum qualifications and KSAs for these positions.
- I'm not convinced that they answered Maggie's comment re needing members of the graduate faculty to mentor and support students- who are their graduate faculty? Career-track faculty are not automatically graduate faculty; there is a criteria document that needs to be established by their graduate faculty on how these individuals (POPs) would meet graduate faculty status.
  - A draft Criteria for Membership in the Graduate Faculty document for this program is attached here. This document was created with guidance from SBS Faculty Affairs, and in accordance with Graduate College policies.
- Has the program assessment plan been vetted by UCATT? The assessment measures don't seem to align with best practices (usually don't use SCS)
  - o I reconnected with David Herring at UCATT who previously advised us on our LOs and assessment measures. He apologized for not catching the use of SCS as an assessment. Per his guidance, we have revised this section to remove all references to the SCS.

# DRAFT Criteria for Membership in the Graduate Faculty for the Master of Resilience Practice program

# A. Prologue:

1 As specified in UHAP Policy 3.1.04:

Members of the graduate faculty have special privileges and obligations within graduate education, especially related to thesis, dissertation and other culminating capstone project committee roles and membership, as well as graduate student advising and mentorship. Graduate faculty membership is automatically granted to tenured and tenure-track faculty and continuing-status and eligible academic professionals with faculty titles and may be granted selectively to career track faculty or others. The Graduate College, in coordination with the academic colleges and programs, oversees the criteria, processes, and procedures related to the granting, review, and in rare cases of unacceptable performance, the remediation or removal of graduate faculty membership to ensure the quality of graduate programs and delivery of graduate education

- The Graduate College policies governing graduate faculty membership are set out here: https://grad.arizona.edu/policies/academic-policies/graduate-faculty-policy
- 3 Members of the Graduate Faculty are expected to maintain the "Responsibilities of Graduate Faculty", as outlined in section 4.1 of the Graduate College policy.

# B. Tenured/Tenure-Eligible, Continuing Status/Eligible Academic Professionals

As per UHAP Policy 3.1.04 and section 1.1.1 of the Graduate College Graduate Faculty Policy<sup>1</sup>, Tenure-eligible/tenured faculty and Continuing Status eligible/Continuing Status academic professionals with faculty appointments are automatically members of the Graduate Faculty.

<sup>&</sup>lt;sup>1</sup> https://grad.arizona.edu/policies/academic-policies/graduate-faculty-policy

# C. Members of the Graduate Faculty in Other Programs without FTE in SBS

Faculty who are members of the Graduate Faculty in other programs<sup>3</sup> but who do not hold FTE in SBS may serve as members of the Graduate Faculty with the following criteria:

- a) Have a terminal degree in a field related to resilience, adaptation, sustainability, or environmental management, and
- b) Have a record of strong mentorship of graduate students.
- Have applied and practical experience in fields related to resilience, adaptation, sustainability, and/or environmental management.

# D. Emeritus Faculty

As per section 1.1.2 of the Graduate College Graduate Faculty policy, faculty who have been awarded Emeritus status by the President of the University of Arizona are automatically members of the Graduate Faculty in their programs, so long as they continue evidence of currency in their field.

# E. Criteria for membership of Career Track Faculty and Continuing Status/Eligible professionals without faculty titles.

Career Track Faculty and Continuing Status and CS-Eligible academic professionals without faculty titles *may be recommended for an appointment* to the Graduate Faculty in SBS if they meet at least two of the following criteria:

- a) Hold a terminal degree in a field related to resilience, adaptation, sustainability, or environmental management.
- b) Have a record of strong mentorship of graduate students.
- c) Have applied and practical experience in fields related to resilience, adaptation, sustainability, and/or environmental management.
- d) Have experience conducting research as evidenced by grants, publications, or conference presentations in their discipline.

<sup>&</sup>lt;sup>3</sup> Note that the Graduate College does not maintain a list distinguishing among Graduate Faculty Members in different programs. It is the responsibility of each program to ensure that graduate committees are composed of program-approved members. The program does this verification when the DGS approves GradPath forms.

# F. Vote on Membership in SGPP Graduate Faculty

In order to add a faculty member under sections C & E, AIR/SBS shall forward a nomination for approval to the SBS Dean's office, including a current CV, after a vote according to the voting rules outlined in SBS's bylaws, namely by simple majority of tenured, tenure eligible, and professor-titled career track faculty.

Program Approval Graduate Faculty Criteria: DRAFT ONLY

Academic College Dean's office approval:

Graduate College Approval: Date:
